

Extend your BI solution with our Qlik Extension Write! for more efficient analytics and cross-departmental collaboration.

Write!, formerly Write! Edit, offers you a comprehensive set of features to extend your Qlik Sense solution to extract better analytics from your data, improve your data quality, and foster cross-departmental collaboration.

THIS IS WHY YOU SHOULD CHOOSE WRITE!

By using a wide range of data entry types (dropdowns, free text, checkboxes, calendar fields, ratings, etc.) you can implement a wide variety of use cases in Qlik. Expand your scope in Qlik with the all-important Writeback feature of Write! Through the direct and automatic writeback in Qlik, you can comment on and edit data records in real time.

Write! is enterprise-ready and suitable for companies of all sizes. Simply contact us and we will find the right solution for your application.

- ✓ Editing data directly in the user interface
- ✓ Creation of new data in Qlik
- ✓ Writing the data back into a database
- ✓ Editing data via mobile device
- ✓ High data quality and avoidance of incorrect entries through logically linked dropdowns
- ✓ Free choice of input masks/input fields, e.g.: free text fields, checkboxes, dropdown fields, calendars, traffic lights, ratings and mathematical formulas

Selected Write! Use Cases

WORKFLOW FOR APPROVAL PROCESSES

The creation of approval processes is an important topic for many Qlik Sense users. Write! makes it easy to implement such processes in Qlik Sense.

CRM

Write! allows you to build a CRM system directly in Qlik Sense. Track sales cycles, customer activity and your pipeline. Even creating new records is easier than ever before thanks to the Writeback feature..

PROJECT PLANNING

Write! allows you to create and manage projects in Qlik Sense. Assigning the responsible persons and the real-time calculation of the project budget are done directly in Qlik Sense.

SUPPLIER EVALUATION

Implement supplier evaluation and ABC analysis in Qlik Sense with Write! Purchasing can evaluate suppliers live in Qlik Sense and prepare and present the results with appropriate visualisations.
